Critical Area Lot Coverage and Disturbance Calculations

This worksheet will quantify disturbances and lot coverage associated with both existing and proposed construction on your building site.

For Building Permit Applications within the Critical Area:

Please complete columns 1, 2, and 3 below listing area of the first floor or ground level footprint of each existing and proposed structure or site amenity.

For all Building Permit Applications Regardless of Zoning Districts:

Please compute area and note in column five (5) ground disturbance associated with proposed construction by using the following criteria: 1) Include a 20-foot buffer around the footprint of the proposed structure or addition, 2) A 10 foot buffer shall be included on each side of the proposed driveway or sidewalk, 3) Disturbance for septic system placement is calculated to be 750 square feet. In column (6), please record disturbance as listed in column (5) without the disturbance for the septic system.
