

Death by Opioid Overdose is Preventable

Painkillers such as Oxycontin or Percocet, and street drugs like heroin are known as OPIOIDS. Opioids are the leading cause of drug overdose.

Narcan is a medication that rapidly reverses an opioid overdose

If someone you know is abusing prescription painkillers, heroin or other opioids, sign up for a **FREE** training held on the 1st Tuesday of each month from 5:30 - 7:00pm at the Talbot County Health Department 100 S. Hanson Street, Easton, MD 21601

Pre-registration is required
Please Call 410-819-5600
